

Sinclair Broadcast Group's does not care about democracy; instead it is more concerned with swaying a national election with its immense power as a media company that owns too much of the market. This is a perfect example of the problems that arise when you relax the media ownership rules and restrictions.

THIS MUST BE STOPPED IMMEDIATELY AND THE RELAXED RESTRICTIONS MUST BE REVERSED!

These companies are no longer concerned with serving the public interest. They are concerned with making money regardless of the cost to the American people and the foundation of fairness that this country was founded on. We need a strong return to local news presented and written by and for the local people. Instead we are getting news from centralized offices that have no stake in informing the people and that is hurting the principles of democracy.

Please see the errors in your ways! We are begging you. This has gone entirely too far, and as taxpaying citizens of the USA, we are furious.

As a citizen of Florida, I want to contest the license of the Sinclair Broadcast Group. The madness has gone far enough!

Please make this stop. We implore you to take the position of leadership. Democracy is in deep trouble. Please.
